

# Results at lightning speed.

Throw out the faxes, scans, and phone calls. Improve workflow efficiencies by instantly integrating diagnostic orders into your EHR and exchanging real-time clinical results from up to 26 regional data feeds.

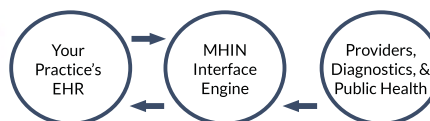

Results ordered or copied by providers can be routed electronically from many major health facilities in the region, including:

- The Medical Foundation
- Saint Joseph Regional Medical Center
- Beacon - Memorial Hospital
- Beacon - Elkhart General Hospital
- IU Health LaPorte Hospital
- IU Health Goshen Hospital
- Community Hospital of Bremen
- Sturgis Hospital
- Adams Memorial Hospital
- MRI Center
- Unity Medical & Surgical Hospital (Soon!)
- Michiana Hematology Oncology (Soon!)

Save time, cut costs, and coordinate care with our MHIN Integration results automation solution. MHIN Integration is powered by 16 years of 1.8 million electronic health records in our mature Health Information Exchange network.

## MHIN Integration

A PREMIER TOOL FOR VALUE BASED CARE

- Receive diagnostic results directly through your EHR
- Replace the need for expensive faxing, scanning, calling, and courier services
- Integrate discrete results securely in real-time
- Vendor management packaged into a single interface
- Automated sharing protocols for Continuity of Care Documents (CCDs)
- Automated sharing protocols for Diabetic Retinal Exam Documents
- Score points toward MACRA's Advancing Care Information incentive system
