

### Highlights

To improve system performance, the Show More Results bar will be added to the Flowsheet. This addition enhances the Flowsheet with the following multi-layered default result display settings:

#### 1. Clinical Date Range Bar

- Defaults to the last **20** years.

#### 2. Show Results Bar

- **Date range** - Indicates the specific date range of the displayed results. This date range will change as the number of displayed results is changed by the user.

Showing results from (7/12/2016 - 4/9/2019)

---

**Note:** The maximum number of default results is 900.

---

**Note:** The "Show Results" start and end dates will rarely be the same as the Clinical Date Range.

---

- **Show More Results button** – Users can access additional results, if available, by clicking the Show More Results button. The system will display up to 900 more results with each click until all results within the Clinical Date Range are displayed.

Show more results

---

**Note:** The Show More Results button will automatically disable (turn grey) if there are no additional results available to display within the selected Clinical Date Range.

---

### Important Information

Refreshing the Flowsheet will automatically default the displayed results back to the initial result count.

Modifying the Clinical Date Range after the default Show Result count has been changed will consequently Refresh the flowsheet, and automatically reset the displayed results back to the initial default result count.
